

Parts, at their real sizes.

Every height, radius and inset below is the value that ships — read out of packages/ui, not redrawn by eye. The console is dark-first, so this is the default state, not a theme.

Spacing

4px base — tailwind scale, no custom steps

PAGE GUTTER

32px · content caps at 1248

SECTION GAP

32px · page header to body

CARD INSET

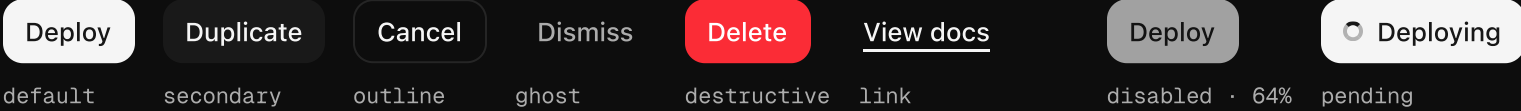

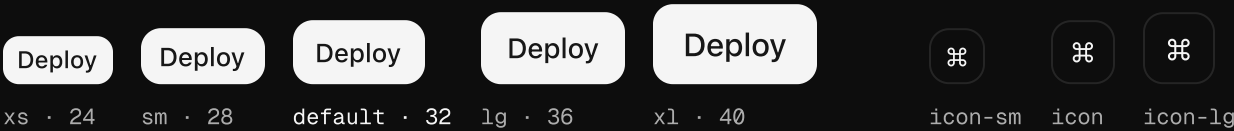

16px · 20 on wide cards

TABLE ROW

10px · p-2.5, hairline below

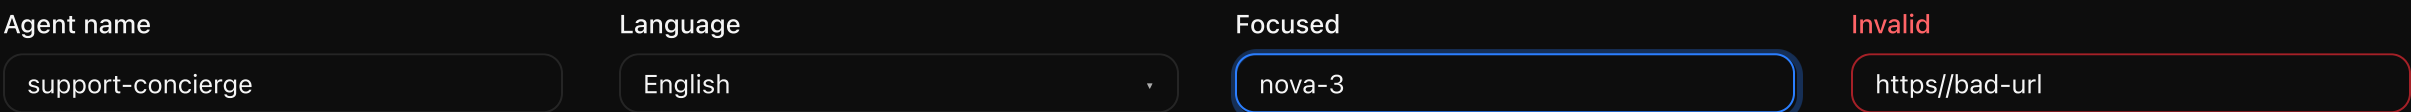

Buttons

desktop heights — the sm: step wins above 640

Controls

input 30px desktop · 10px radius · 1px input border

Status

fill at 500, text lightens to 400 — never the same value

Blocks

titles are nouns · no description under a title

PAGE HEADER

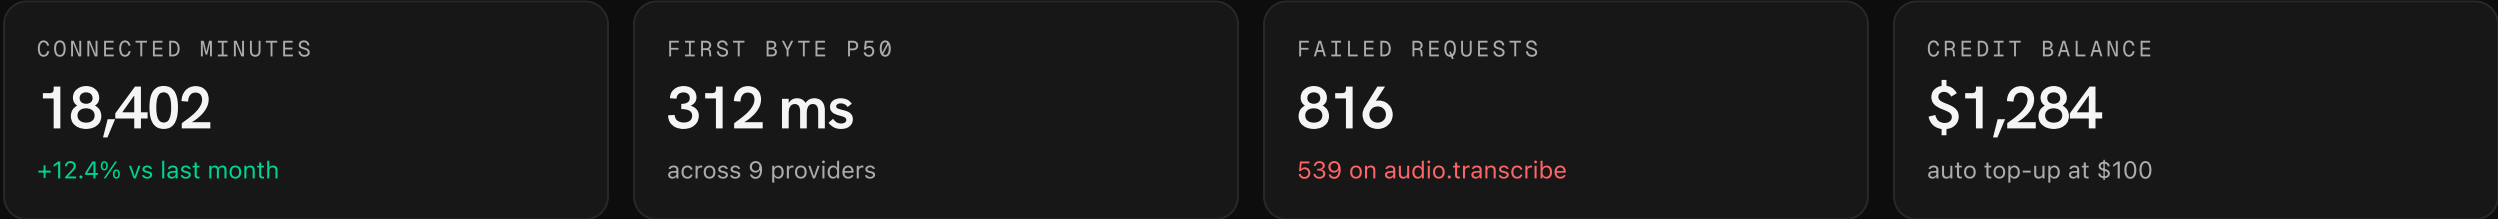

Models
